M8 USER MANUAL

1. Overview

Thank you for purchasing a M8 mobile phone.

2. Warnings

Not following these simple guidelines may be dangerous or illegal. Read the complete user guide for further information.

TURN ON SAFELY

Do not turn on the phone when wireless phone is prohibited or when it may cause interference or danger.

ROAD SAFETY

Obey all road safety laws. Always use both of your hands to operate the vehicle while driving.

INTERFERENCE

All wireless phones may be sensitive to interference, which may affect performance.

TURN OFF IN HOSPITALS

Follow all restrictions. Turn off the phone near medical equipment.

TURN OFF ON AIRCRAFTS

Follow all restrictions. Wireless devices can cause interference on aircrafts.

TURN OFF WHEN REFUELING

Do not use the phone at/near refueling stations. Do not use near fuel or chemicals.

USE SENSIBLY

Only qualified personnel may install or repair this product.

ENHANCEMENTS AND BATTERIES

Use only appropriate enhancements and batteries. Do not connect incompatible products.

WATER-RESISTANCE

Your phone is not water-resistant. Keep it dry.

BACKUP COPIES

Remember to make back-up copies or keep a written record of all important information stored in your phone.

CONNECTING TO OTHER DEVICES

When connecting to any external device, read its user guide for detailed safety instructions. Do not connect with incompatible products.

3. List of Main Menus and Submenus

In standby screen, press left key to access the main menu. The main menu includes items: (1) File manager (2) Phonebook (3) Fun (4) Call center (5) Messaging (6) Multimedia (7) Organizer (8) Settings (9) Profiles (10) Extras (11) Services (12) Shortcuts .

4. Call center

In the call history menu, you can check dialed calls, received calls, missed calls, etc.

5. Phonebook

This mobile phone provides phone book function to save the information of the contact persons such as name, mobile phone number, home number and etc. you can choose phone book from main menu to open it.

6. Service

This function menu you can visit internet.

7. Multimedia

7.1 Video recorder

After enter video recorder, press OK key to shoot, press left soft key to access Options, press right soft key to back.

7.2 Video Player

Preview the videos. Press navigation keys and OK key to operate the video player. Press left soft key to access Options.

7.3 FM Radio

Enter FM radio. Press * key or # key to adjust volume. Press up/down navigation keys to change channels.

7.4 Sound Recorder

You can take a recorder in this function.

7.5 Picture Browser

Go to album and view all pictures stored.

8. Alarm

The alarm clock feature sounds an alert or makes a vibration alert at a time you specify.

9. Multimedia

9.1 Video recorder

After enter video recorder, press OK key to shoot, press left soft key to access Options, press right soft key to back.

9.2 Video Player

Preview the videos. Press navigation keys and OK key to operate the video player. Press left soft key to access Options.

9.3 Audio player

This function menu is used to store and play the audio files.

9.4 Sound Recorder

You can take a recorder in this function.

9.5 FM Radio

Enter FM radio. Press * key or # key to adjust volume. Press up/down navigation keys to change channels.

10 Messages

10.1 Write Message

This function can begin a new text message or multimedia message.

10.2 Inbox

Check all received messages.

10.3 Outbox

Checks the information of unsuccessfully sent message in outbox.

10.4 Draft box

You can save unsent and edit incomplete messages in draft box.

10.5 Sent box

Check all sent message in sent box.

11. Fun&Games

This function menu is games.

12. Camera

There is a camera function in the phone, choose the camera menu to open it.

13.Image viewer

Go to album and view all pictures stored.

14. Organizer

14.1 Calendar

You can use this feature to view the year, date and term easily. Use navigation keys to navigate other date. Press left soft key to enter submenu to do options.

14.2 Alarm

The alarm clock feature sounds an alert or makes a vibration alert at a time you specify.

14.3 Torch

You can use this function to On/Off flash light.

14.4 Bluetooth

This mobile phone supports Bluetooth wireless connection. You can establish wireless connection between mobile phone and device to realize voice communication, data exchange and synchronization.

14.5 World clock

This function menu is world clock.

14.6Calculator

This feature can use your phone as a calculator for simple calculations.

14.7 shortcuts

This function menu is shortcuts.

15. File Manager

Enter this menu; you can check the files store on memory card. Select one file to open and press left soft key, you can do options.

16. User Profiles

This phone provides several profiles to fit different conditions.

17 Settings

This phone provides phone settings to fit different conditions.

18.1 Letter entry mode

Press a key once to insert the first letter on the key, twice for the second letter, etc. If you pause briefly, the last letter in the display is accepted and the text awaits the next entry.

For example, press the "2" key continuously, it will appear "a"、"b"、"c"、"2"one by one.

18.2 Number entry mode

Number Entry Mode can input the number in the text, such as telephone number. Tap the proper number and input it.

FCC Statement：

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

SAR Information Statement

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. * Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating

can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is **0.983W/Kg** and when worn on the body, as described in this user guide, is **0.555W/Kg**(Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements).

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/ oet/fccid after searching on

FCC ID: 2ABBS-M8 Additional information on Specific Absorption Rates (SAR)

can be found on the Cellular Telecommunications Industry Asso-ciation (CTIA) web-site at http://www.wow-com.com. * In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a sub-stantial margin of safety to give additional protection for the public and to account for any variations in measurements.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of **15mm** must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
